

Graduate Diploma in Supply Chain Management TK2002 Level 7

To enable degree graduates to study and gain a significant body of knowledge about supply chain management. Graduates will contribute to the success of industry, through the application of specialised knowledge and skills in supply chain management.

You will learn how to:

- apply specialised technical knowledge and skills to the supply chain management field
- integrate into your workplace environment quickly

PROGRAMME INFORMATION

BAM6.016 Project management

To enable the student to learn the basic principles and terminology of the profession of project management, and apply this to create project plans. Students will also be given a brief introduction to using project management software tools, such as MS Project.

BAM6.017 Operations Management

The aim of this course is to give students an understanding of the concepts and analytical methods that contribute to the systematic direction and control of the processes that transform inputs into completed goods and services. Operations management focuses on the management of people and resources through systematic management and feedback. Students will gain introductory knowledge and experience of an operation's contribution to the macro-management environment.

BAM6.030 E-Commerce

Enable students to gain a practical understanding of e-commerce and its role in business.

BAM7.008 Resource Integration

To develop skills, knowledge and expertise in the related disciplines of supply chain management, business facility layout/modification, and engineering economics, to ensure resource integration occurs at various levels for business operation, technical management, project management and production of goods or services.

BAM7.024 Contemporary Issues in Supply Chain Management

Enable students to recognise, analyse and solve contemporary issues in local and global logistics and supply chain management.

BAM7.019 Professional Practice A

To develop research capabilities related to chosen area of specialisation, and enable students to complete a "hands-on" immersion in industry practice as part of BAM7.020.

Graduate Diploma in Supply Chain Management TK2002 Level 7

Programme Specific Information

This one year full-time programme allows you to graduate at the same level as a degree student and with a focused file of knowledge. It is designed for people who have a degree in one area and want to change their area of specialisation or career. It is also for people who have a level 6 or 7 Diploma and/or several years of relevant work experience who wish to gain a qualification or update their skills in the area they are working.

You will learn the theory about supply chains and the challenges associated with the management of getting the right product to the right person in the most cost effective and timely manner. Content includes project management, e-commerce, resource integration, contemporary issues in supply chain management and an industry project. This qualification provides a thorough grounding in business and management practice, appropriate for people wishing to enter management roles in business.

The Graduate Diplomas are designed so that students can complete them in one year's full time study. However, it is also possible for students to select part time study options, which will increase the programme duration. To be awarded a Graduate Diploma you will successfully complete 120 credits at Levels 6 and 7 as shown below:

- 120 credits
- all compulsory papers specified for the Graduate Diploma
- a minimum of 45 credits at Level 6
- a minimum of 75 credits at Level 7

Enrolment resources and timetables are available at www.witt.ac.nz.

Note: timetables are subject to change

PROGRAMME INFORMATION

BAM7.020 Professional Project B

To develop capabilities related to chosen area of specialisation, in a "hands-on" immersion in industry practice. To enable students to apply their learning, test the relevance of academic theories to the workplace and to reflect critically on this relationship between their academic study and industry practice. To enable students to carry out a significant work assignment for the host organisation on a topic in a field allied to their major and present a project report in conjunction with an academic supervisor. The project forms the final component of the programme and requires students to produce work of the highest quality as evidence of their development.
