

Business and Management

Stand-alone courses | 22 July – 30 November | Run for 17 weeks

ACCOUNTING PRACTICES

ROOM: B310 Mon, Wed 1pm – 3pm

BAM5.010

Purpose:

To provide students with the skills and knowledge to record and process financial transactions and prepare financial statements and cash budgets for entities.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Manually process transactions from source documents to trial balance for a sole trader.
2	Process transactions, using commercial accounting software, to prepare financial statements for a small company registered for GST.
3	Demonstrate knowledge of internal controls.
4	Process balance day adjustments and prepare financial statements.
5	Compare the key differences in the financial statements for entities and prepare financial statements.
6	Prepare, using spreadsheet software, a cash budget incorporating GST.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Assignment 1 Manual	25%
Assignment 2 MYOB	25%
Assignment 3 Excel	5%
Exam	45%
Total	100%

ACCOUNTING PROCESSES

ROOM: B310 Mon, Wed 1pm – 3pm

DBA5.006

Purpose:

To enable students (a) to record and process a wide range of financial transactions, (b) to manage the financial transactions of a small business using up to date accounting software, (c) to examine and apply accounting concepts and process adjustments.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Record and process a wide range of financial transactions.
2	Demonstrate the ability to record accounting processes for a GST registered business using current accounting software.
3	Apply accounting concepts and process balance day adjustments.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Assignment 1	30%
Assignment 2	25%
Final examination	45%
Total	100%

APPLIED BUSINESS PLANNING

ROOM: B211 Mon, Thur 1pm - 3pm
DBM5.014

Purpose:

Students will be able to contribute to the business planning for efficient and effective performance of an entity.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Develop the mission, vision, values for a business plan.
2	Develop the goals, objectives, direction and performance measures for a business plan.
3	Conduct analyses of the internal and external environments for a business plan.
4	Develop and present a business plan and associated implementation plan.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Assignment 1	20%
Assignment 2	30%
Assignment 3(a) – written	35%
Assignment 3(b) – presentation	15%
Total	100%

BUDGETING AND TAXATION

ROOM: B203 Mon, Wed 3pm-5pm
DBA5.007

Purpose:

To introduce students (a) to preparing and using budgets as a management tool to monitor the performance of a business entity, (b) to applying tax rules for small businesses and individuals.

Learning outcomes:

On successful completion of this course students will be able to:

NO	LEARNING OUTCOME
1	Prepare a budget for a small business.
2	Prepare and use budgets to monitor business performance for a business entity.
3	Identify and apply tax rules for individuals.
4	Identify and apply tax rules for a small business.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Assignment 1	25%
Assignment 2	40%
Assignment 3	35%
Total	100%

BUSINESS STATISTICS

ROOM: B102 Wed, Thu 3.30-5.30pm

BAM5.009

Purpose:

To enable students to make sense of numbers, graphs and fundamental statistical concepts; and to use, interpret and report them in a meaningful way in business practice. This paper also provides a foundation for further study, research and project management requiring an analytical approach.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Introduction to Data Analysis. At the completion of this topic the student will: have an appreciation of the diverse nature of data in the business environment; be familiar with the scientific approach to information provision in business; be able to apply mathematical techniques including basic algebra to business data.
2	Descriptive Statistics. At the completion of this topic the student will be able to: collect data using statistical sampling methods; organise, analyse and summarise data from a variety of business sources using computer based statistical packages; interpret and report on findings in a manner which would be useful to people with and without significant statistical knowledge.
3	Decision Making in an Uncertain Environment. At the completion of this topic the student will be able to examine, calculate and report on quantitative changes, patterns and relationships in business data using the tools of index numbers, time series and correlation and regression.
4	Measuring Change in the Business Environment. At the completion of this topic the student will be able to analyse, make decisions and report on these decisions in a business environment, where uncertainty is the norm, using the tools of probability models and statistical inference.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Test	20%
Assignment	40%
Examination	40%
TOTAL	100%

NZ BUSINESS CONTEXT

ROOM: B310 Mon, Wed 10am - 12pm

DBC5.004

Purpose:

Students will develop an understanding of how culture, heritage, sustainability and internal and external environments influence New Zealand business entities. This course will develop students' awareness and knowledge of New Zealand historical events that influence social, cultural, political and economic structures.

Learning outcomes:

On successful completion of this course students will be able to:

ADVANCED PROJECT MANAGEMENT*

ROOM: A114 Mon 5.30pm - 8.30pm

BAM7.013

Purpose:

This course will enable the student to learn the principles of the project management body of knowledge and cover the content of the Project Management Institute PMBOK® and its application and evaluation to the workplace.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Evaluate the processes followed by project initiation.
2	Develop documents containing project planning including scope planning, scope definition, creation of WBS, and scope control.
3	Develop Cost profiles for a project and evaluate project performance against baseline estimates.
4	Apply Quality Management principles to projects and analyse the impact of this on project success.
5	Evaluate Human Resource Management assigned to projects, including balancing workload and analyse the impact of this on resource utilisation and cost.
6	Evaluate Communications Management within the context of running a project.
7	Describe and assess activities involved with Project Integration Management and appraise the effectiveness of a project using principles of project Control, including cost and schedule variance, earned value.
8	Analyse issues, and evaluate solutions, that may arise during project closure.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Assignment	20%
Test	20%
Project	60%
TOTAL	100%

CONTEMPORARY ISSUES IN HRM

ROOM: B212 Thu 9am - 12pm

BAM7.006

Purpose:

To students to be able to critically examine contemporary issues in human resource management locally nationally and internationally. Once identified the issues will be evaluated for their impact on the human resource professional and the human resource function within organisations. The issues researched and analysed will reflect the dynamic nature of the current HRM environment.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Identify and appraise the relevant sources of current information locally, nationally and internationally which inform the human resource professional.
2	Research, analyse and critically evaluate the literature to determine the impact of current business issues on HRM.
3	Appraise contemporary HR issues and developments and discuss their implications for HRM on an international, national and local level.
4	Develop innovative, efficient and effective human resource solutions to selected current business issues.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Assignment	50%
Assignment	50%
Total	100%

PRODUCT DEVELOPMENT

ROOM: B203 Thu 1pm - 4pm

BAM7.007

Purpose:

To examine the requirements for the effective management of the cross-functional activities in new product and service development, and critically evaluate appropriate tools and methods for achieving the best outcomes.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Compare and contrast process frameworks for developing new products and services.
2	Describe and critically evaluate the typical activities and best practices within the various stages and sub-stages of a generic New Product/Service Development (NPD) Process.
3	Design a customised NPD Process for a particular firm contingency.
4	Identify and critically evaluate appropriate NPD tools and methods, and demonstrate capability in applying some in a practical situation.
5	Assess NPD performance.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Assignment 1	25%
Assignment 2	35%
Final Examination	40%
TOTAL	100%

RESOURCE INTEGRATION MANAGEMENT

ROOM: B203 Thu 9am - 12pm

BAM7.008

Purpose:

To develop skills, knowledge and expertise in the related disciplines of supply chain management, business facility layout/modification, and engineering economics, to ensure resource integration occurs at various levels for business operation, technical management, project management and production of goods or services.

Learning outcomes:

On successful completion of this course the student will be able to:

NO	LEARNING OUTCOME
1	Propose and analyse techniques and strategies for the management of supply chains.
2	Analyse strategic concepts or factors that guide or affect planning, policy development, and the organisation and flows of supply chain management.
3	Evaluate the key perspectives and phases of design and their later implications for production, delivery, and in-service sustainment.
4	Apply principles of designing operational facilities as regards human factors engineering, systems safety and fiscal risk and evaluate their impact on operational objectives including efficiency and return.
5	Evaluate logistics implications in production operations.
6	Evaluate the application and derivation from economics and accounting fundamentals to production engineering economics.
7	Describe and apply criteria for identifying external consultancy needs and performance expectations at various professional levels.

Assessment requirements:

ASSESSMENT TASK	WEIGHTING
Test	20%
Case Study	30%
Group Project	50%
Total	100%
