

New Zealand Certificate in Construction Trade Skills (Carpentry) (Level 3)

Start your building career here! Our one year certificate will teach you all the necessary skills to prepare you to be a building apprentice.

You will learn how to:

- Work safely and in accordance with compliance and regulatory requirements in the construction trades sector
- Communicate effectively with colleagues and customers within the construction industry
- Read and use specifications and drawings to complete simple construction projects
- Perform simple calculations to complete a range of familiar tasks in the construction sector

Graduates of the Carpentry strand will also be able to:

- Understand and apply specific carpentry terminology and concepts such as line, level, square and plumb when carrying out carpentry work in a project environment
- Understand basic building technology, the properties of timber, concrete, steel and composite products, interior and exterior linings and fittings, and apply this knowledge to carpentry projects
- Use construction and installation processes and techniques while carrying out carpentry projects
- Carry out assigned carpentry work in a project environment

Programme Specific Information

Work Experience

Work experience will constitute 200 of the allocated self-directed learning hours on this programme.

Career Options:

The strands recognise the knowledge and skills required of entrants to allied trades, or the carpentry or joinery trades. The allied trades include painting and decorating, roofing, interior systems and exterior plastering.

Programme Information

Course Code	Course Title	Purpose
CCT3.001	Workplace Safety Frameworks and Practices (Carpentry)	This course aims to introduce students to the legislative frameworks and requirements for workplace safety in the construction industry and requires students to select and consistently apply safe working practices and effective communication skills as they undertake project-based work.
CCT3.002	Skills for Construction Trades (Carpentry)	In this course, students will identify, read, and use specifications and drawings and calculation skills that underpin effective practice in the construction industry.
CCT3.003	Carpentry Terminology and Concepts	This course aims to introduce students to fundamental carpentry concepts and carpentry terminology when carrying out carpentry tasks.
CCT3.004	Building Technology and Properties	In this course, students will explain a range of basic building technologies and outline the properties of building materials/products and linings used in a variety of carpentry projects.
